3M Optical Finishing Products

Safeguard your lens investment with 3M Leap III finish blocking pads.

3M Leap III pads provide superior adhesion that reduces slippage; avoiding errors and breakage.

Superior torque (slip) resistance

Arguably the most critical feature of a blocking pad; maximizes edging performance

Excellent Adhesion

Keeps lenses firmly in place during edging; helps eliminate errors and waste

Double Tabs

Now featured on all pad styles for easier removal and scratch prevention

Printed Liner

Featured on all pads for easy brand identification
